

## Specialty Ceiling Integration

Specialty ceiling systems are widely used throughout architecture and interior design, each with distinct materials, geometries, and installation requirements. Integrating architectural lighting within these diverse systems can present unique challenges, particularly in specialty wood, felt, and metal ceilings where conventional lighting solutions may not align with the ceiling design.

JLC-Tech has developed dedicated mounting solutions that enable our slim 9/16" and 15/16" T-BAR LED and low-profile GEMINI luminaires to integrate seamlessly across a broad range of specialty ceiling systems. These engineered integration approaches support installation in accordance with specification while simplifying field execution. By uniting refined architectural lighting with high-design ceiling systems, JLC-Tech delivers cohesive, visually harmonious ceilings while reducing complex and labor-intensive installation.

### HOW TO SPECIFY

When using a specialty wood, metal, or felt ceiling, select the "W" mounting option on our spec sheets. Our Customer Experience Team will work with you to designate the specialty mounting clip needed for your ceiling design.

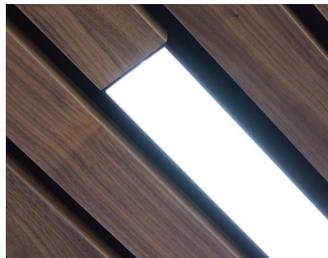

#### T-BAR LED | Order Specification Guide

Optic	Mounting Clips	Color
D = Diffusing Lens	U = Universal	W = White
DW = Diffused White	A = Armstrong	B = Black
B = Block Clear Diffusing Lens	<b>W = Specialty Ceiling</b>	C = Custom
B2 = Block Frosted Diffusing Lens	C = Custom	
C2 = Multi-Reflector		
C2WH = White Multi-Reflector		
C2BL = Black Multi-Reflector		
A2 = Asymmetric <sup>1</sup>		
S = Signage		

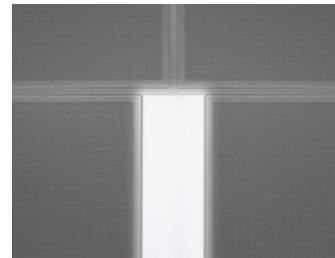

### COMPATIBLE WITH THE FOLLOWING PRODUCTS

T-BAR LED®

GEMINI™ 2"

GEMINI™ 4"
